About Me

I'm a passionate Software Developer who loves turning ideas into interactive, functional, and visually engaging web experiences. With focus on front-end development, I enjoy writing clean React code, optimizing performance, and ensuring great user experiences across all devices.

SKILLS

- C++, Python, HTML, CSS, JavaScript, Golang, MySQL
- Web development frameworks
- Web application frameworks
- Maintenance & repair
- Quality assurance
- Teamwork and collaboration
- Problem solving

LANGUAGES

- Hindi
- English

Education

B.Tech in Computational Science

Indian Institute of Information Technology, Pune, Maharashtra July 2025

Certificate

CPP, Problem Solving and Software Engineering Role.

Achievements

- **CODECHEF**:—Rating: 1732 (Highest 1733)
- **LEETCODE**:—Rating: 1364 (Highest 1674), Top 24%, 175+ Questions
- **ATCODER**:—Rating: 714 (Highest 733)
- **HACKERRANK**:—Badges in CPP, Problem Solving, MySQL, Python

Projects

Encrypted Chat Application

Designed and built a secure communication platform enabling users to exchange messages encrypted with a shared unique key. *Implemented using React, Node.js, and MongoDB with token-based authentication and secure session handling.*

Responsive e-Commerce Application

Developed a full-stack, database-driven e-commerce application featuring admin dashboard. *Responsive design using React + Tailwind CSS, with Node.js + MongoDB backend for API handling and data management.*

Back Testing Application

Implemented a Python-based financial analysis tool for backtesting stock trading strategies, *including data handling, visualization, and performance metric computation.*
